

THE SUNN® 112 LOUDSPEAKER

Your new Sunn 112 Loudspeaker is equipped with a 12" Celestion® speaker and is capable of handling 75-watts of power. The sturdy cabinet is made from 7-ply birch/maple plywood and features removable casters. The Sunn 112 Loudspeaker was designed for use with the *Sunn Model T50C* amplifier or any other professional quality instrument amplifier. To more fully understand the operational characteristics of your Sunn 112 Loudspeaker, please read through all instructions and heed all caution and safety warnings on both your amplifier and Sunn 112 Loudspeaker cabinet.

CONNECTING MULTIPLE SUNN 112 LOUDSPEAKERS

Multiple Sunn 112 Loudspeakers can be linked together providing additional output. Use standard speaker cable (1/4" plug / 16-gauge or thicker) at the rear panel jacks of each Sunn 112 Loudspeaker cabinet as shown below (FIG. A). Use either jack as the input and the other as output to additional Sunn 112 Loudspeakers. A recommended maximum of three Sunn 112 Loudspeakers can be safely connected to a *Sunn Model T50C* amplifier (See IMPEDANCE LOADS under SPECIFICATIONS to the right). *Note: Avoid possible damage to your amplifier by keeping the speaker impedance (Ω) load within the range specified by the amplifier manufacturer. A speaker impedance load that matches the amplifier specification allows for the most efficient transfer of clean power.*

SPECIFICATIONS

PART NUMBER:	021-1676000
DRIVER:	One 12" (30.5 cm) Celestion® G12T75
CABINET:	3/4" (1.9 cm) 7-ply Birch/Maple Plywood
POWER HANDLING:	75 Watts
IMPEDANCE LOAD:	One Sunn 112 = 16 Ω

A maximum of three Sunn 112 Loudspeakers can be connected to a *Sunn Model T50C* amplifier (keep internal speaker plugged in)

One T50C	+	One Sunn 112	=	8 Ω
One T50C	+	Two Sunn 112's	=	5.3 Ω
One T50C	+	Three Sunn 112's	=	4 Ω

CONNECTIONS:	Two, Parallel Wired, 1/4" Jacks
DIMENSIONS:	Height: 21 5/32 in. (53.7 cm)
	Width: 24 15/32 in. (62.2 cm)
	Depth: 11 9/16 in. (29.4 cm)
WEIGHT:	50 lbs. (22.5 kg)
