FEATURES

TZ-B15 FRONT

INPUT — Standard 1/4" input designed to provide the best response from all instrument pick-ups.

VOLUME CONTROL — This continuously variable control adjusts the input signal and output volume of the amplifier.

ACTIVE EQUALIZATION — The B15 offers an active 3-band EQ network. Each filter provides a cut or boost of 15 db. These low, mid and high frequencies provide a wide range of tone shaping possibilities.

HEADPHONE OUTPUT — Use this jack to connect standard headphones (8-600 ohms). When headphones are inserted, the internal speaker is disconnected. (Always protect your ears against excessive volume).

POWER SWITCH — The switch provides power to the unit. The green LED will illuminate when the amp is turned on.
